Risk Summary (Plain English)

Overall: MEDIUM (max score 12) Key drivers: • Turbulence (PIREPs only) (score 12) — moderate turbulence PIREP near PANC • Icing (PIREPs) (score 9) — light icing PIREP near PANC • Night Operations (score 9) — night ops=yes (night at departure PANC 0820Z, arrival PABE 0920Z) What this means: Meaningful cues are present that may reduce margins. Plan conservative outs and brief triggers. Recommended actions: Consider added fuel margin, confirm alternates, and brief divert/cancel triggers. Reminder: PIC retains final authority and responsibility to delay/divert/cancel if safety margins are not acceptable.
